EDUCATION

Soochow University Suzhou, China

Bachelor of Mathematics and Applied Mathematics (Education) Sep 2019 - Jul 2023

- GPA: 3.2/4
- Major Courses: Programming and Application: C Language (88), Advanced Algebra II (93), Mathematical Analysis II (92), Psychology of Learning and Teaching (93), Competition Mathematics (87)

University of International Business and Economics Beijing, China

Master of Applied Statistics Sep 2024 - Jul 2026

- GPA: 3.84/4
- Major Courses: Modern Statistics (95), Quantitative Finance (97), Sampling (98), Machine Learning (99), AI+X (95), Statistical Survey (90), Statistical Case Study (90)

INTERNSHIPS

Shang Qi Capital (LLP) Mar 2025 - May 2025

Equity Investment Department Intern

- Evaluated companies through roadshows by building structured profiles from public data. Identified growth potential and risks via cross-validation and logical verification, analyzing 20+ firms to support investment decisions. Regularly analyzed the changes in external financial environment and policy and compiled relevant reports
- Conducted interviews with experts, senior executives, customers, and suppliers across four industries: smart manufacturing equipment, lithium battery materials, new energy, and semiconductors. Extracted key data on product sales, capacity planning, competitor landscape, and capital operations. Systematically organized and visualized the data, efficiently processed over 100 interview records, and produced industry briefings
- Conducted an in-depth analysis on the wafer cassette carrier industry, focusing on product features, technical differentiation, and manufacturing barriers of FOUP/FOSB. Performed supply chain research to identify material and process flow dynamics. Leveraged capacity data from eight leading fabs (e.g., TSMC, Samsung) to forecast market demand and analyze competitive landscape. Compiled findings into reports and competitive matrix to support strategic decision-making

SHANGHAI WANT WANT FOOD GROUP CO., LTD. Aug 2025 - Jan 2026

HRBP Department Intern

- Collaborated with hiring departments to clarify job responsibilities, developed candidate personas and job descriptions, and posted positions on multiple platforms. Established a candidate pipeline by combining proactive sourcing and resume screening, communicated with qualified applicants, and scheduled interviews
- Participated in HR interview rounds to assess candidates' motivation, stability, general competencies, and team fit. Assisted business units in conducting professional follow-up interviews and jointly advanced the talent selection process
- Engaged in the full-cycle campus recruitment process, responsible for hosting visiting faculty and students, advocating company culture and introducing role information. Sent assessments to suitable candidates, supported compensation discussions and Q&A sessions for successful candidates, and enhanced the employer brand presence on campus

ACADEMIC ACTIVITIES

An Empirical Study on the Relationship between Air Quality Index and Meteorological Factors in Beijing Sep 2024 - Jan 2025

- Utilized R to clean, integrate, and conduct descriptive statistics on Beijing's Air Quality Index (AQI) and related meteorological monitoring data, systematically presenting data characteristics and distribution patterns
- Built ARIMA time-series, multiple linear regression, and random forest models to quantitatively model the relationship between AQI and meteorological variables from different methodological perspectives and compare performance
- Identified key meteorological variables affecting air quality based on models and empirical analysis, and proposed actionable suggestions for environmental monitoring and public governance accordingly

Research on the Road Bicycle Market Among College Students in Beijing Nov 2024 - Mar 2025

- Focused on the consumption behavior and market demand of university students in Beijing regarding road bicycles. Designed a stratified sampling questionnaire survey targeting over 20 universities in Beijing, collecting 411 valid responses. Combined in-depth interviews and literature review to systematically gather and analyze consumption behavior characteristics and demand structure of university students in the road bicycle market
- Conducted reliability and validity tests on the questionnaire using SPSS, constructed a structural equation model, and quantitatively analyzed the latent relationships among purchase intention, brand awareness, and consumption behavior of university students
- Based on data and model findings, developed a targeted campus marketing strategy for the enterprise across three dimensions: product positioning, channel deployment, and communication tactics, providing decision-making support

SKILLS & HOBBIES

- **Skills:** Python, SQL, SPSS, R, C
- **Hobbies:** Drawing, badminton, movie, reading, photography
